

Pizza Sales

Analysis Dashboard

Author : Nabil Azmi Saputra

Background

Pizza sales data is analyzed to understand customer behavior, sales performance, and product popularity.

This analysis helps identify revenue drivers, best-selling pizzas, and monthly sales trends to support business decision-making.

What do we want to know?

- How much total revenue is generated?
- How many orders are received?
- What is the average order value?
- Which pizza categories sell the most?
- What are the top 10 best-selling pizzas?
- How does revenue change over time?

What happened?

Total Revenue
\$817

Total Order
2135

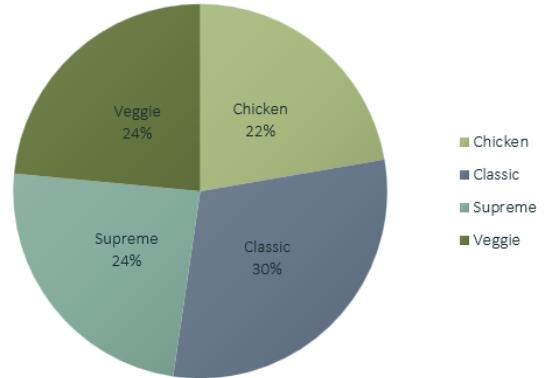

AOV
38.3

The **total revenue** shows the overall business performance, while the **total number of orders** reflects customer demand.

The **average order value** indicates how much customers spend per **transaction** on average.

Quantity Per Category

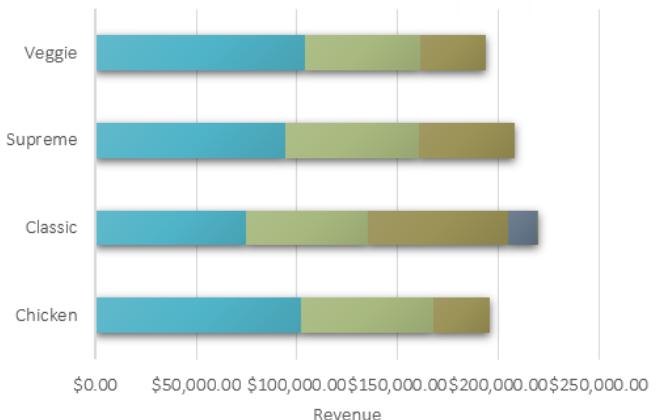

Quantity Per Category

Classic and **Supreme** pizzas dominate total sales quantity, indicating that customers prefer **traditional and premium pizza types** compared to other categories.

Revenue by Pizza Category

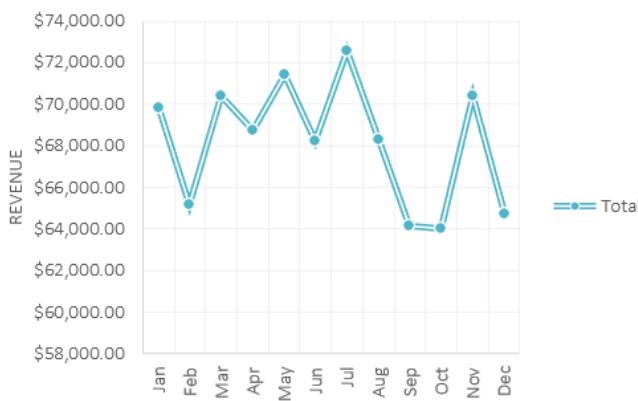

Revenue By Category Pizza

Although sales quantities vary, **Classic** and **Supreme** categories contribute the **highest revenue**, showing a **strong relationship** between popularity and profitability.

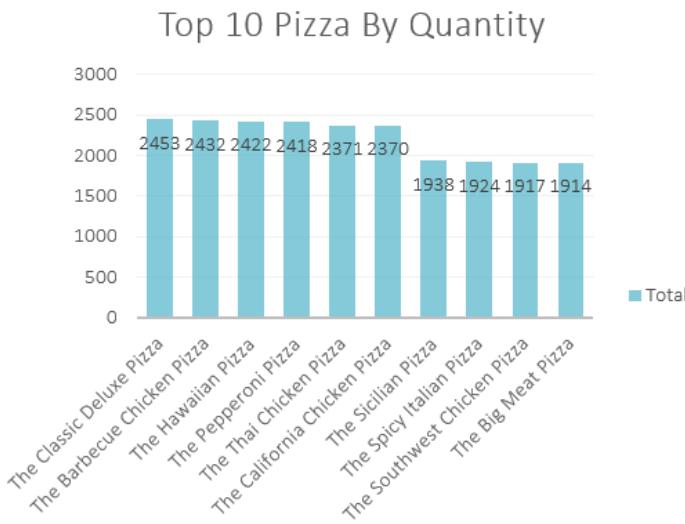

Revenue Trend Per Month

REVENUE TREND PER MONTH

Monthly revenue shows fluctuations throughout the year, with certain months experiencing **higher sales**. This pattern may indicate **seasonal demand or promotional effects**.

What are the best-selling pizzas?

The **Classic Deluxe Pizza** variants consistently dominate sales, suggesting key products that should be **prioritized** in promotions and **inventory planning**.

What Can We Learn?

- Focus marketing on top-selling pizzas
- Maintain stock for high-demand categories
- Use monthly trends to plan promotions

Conclusion

This analysis provides **insights** into sales performance, customer preferences, and revenue trends. The dashboard and analysis can support better pricing, promotion, and product strategy decisions.

Key Insight

- **Classic** and **Supreme** pizzas dominate sales and revenue
- A small number of pizzas drive **most of the demand**
- Monthly revenue shows **seasonal fluctuations**
